The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	Application No. 10/538,685	Applicant(s) MULVEY, KEVIN CHARLES	
	Examiner Mark J. Beauchaine	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Oath/Declaration***

The declaration filed 10 November 2005 is objected to because it contains incorrect attorney docket, international application and foreign priority numbers.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Patent Number 5,564,548 by Dobbins et al ("Dobbins"). The money acceptor disclosed by Dobbins comprises sensor circuitry 20 to provide money item signals of a values as a function of respective money items under test (see column 3, lines 48-60) and processor 35 to develop a transformed signal for each money item under test as a function of the money item signal and a variable parameter that is a function of an acceptability criterion of the money item under test (see column 10, lines 18-33). Said transformed signal is transformed in accordance with a rule based expert system. Said processor further makes a comparison of the values of the transformed money item signals within a window limit value, and causes said money acceptor to accept each

money item based on said comparison (see column 11, line 66 through column 12, line 11). Dobbins further discloses said variable parameter being a function of history data relating to values of money item signals (see column 10, lines 18-22), and said transformed signal as being developed by scaling said money item signal in accordance with an amplification factor.

### ***Conclusion***

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number 5,931,277 by Allan et al because of its scaling factor P, and  
Patent Number 5,687,830 by Hayes et al because of its processor 58.
